4. Focus Your Audience Attention

Teknik Presentasi Data – Fitrah Maharani Humaira

where are your eyes drawn?

where are your eyes drawn?

Background

- Persepsi visual → pemrosesan di otak kita yang didapat dari penglihatan kita

3 tipe memori

Iconic memory

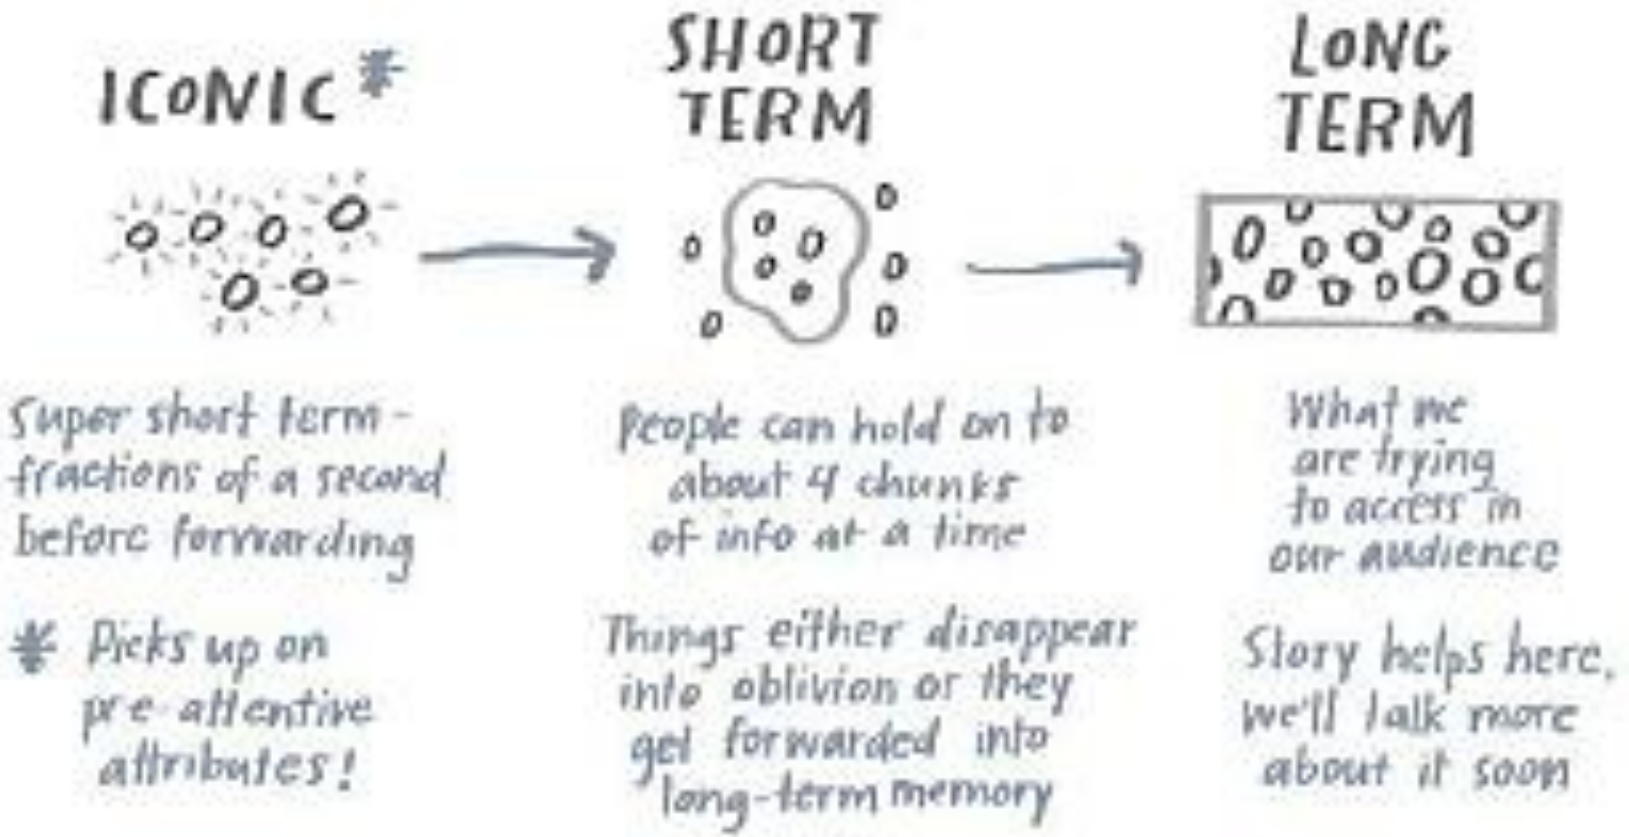

Short term memory

Long term memory

Three types of memory

Memory

Mata melihat informasi

⬇️

Iconic Memory

"Saya melihat sesuatu."

⬇️

Attention / perhatian

"Ini menarik/penting."

⬇️

Short-Term Memory

"Saya sedang memikirkan informasi ini."

⬇️

Processing / pengolahan

⬇️

Long-Term Memory

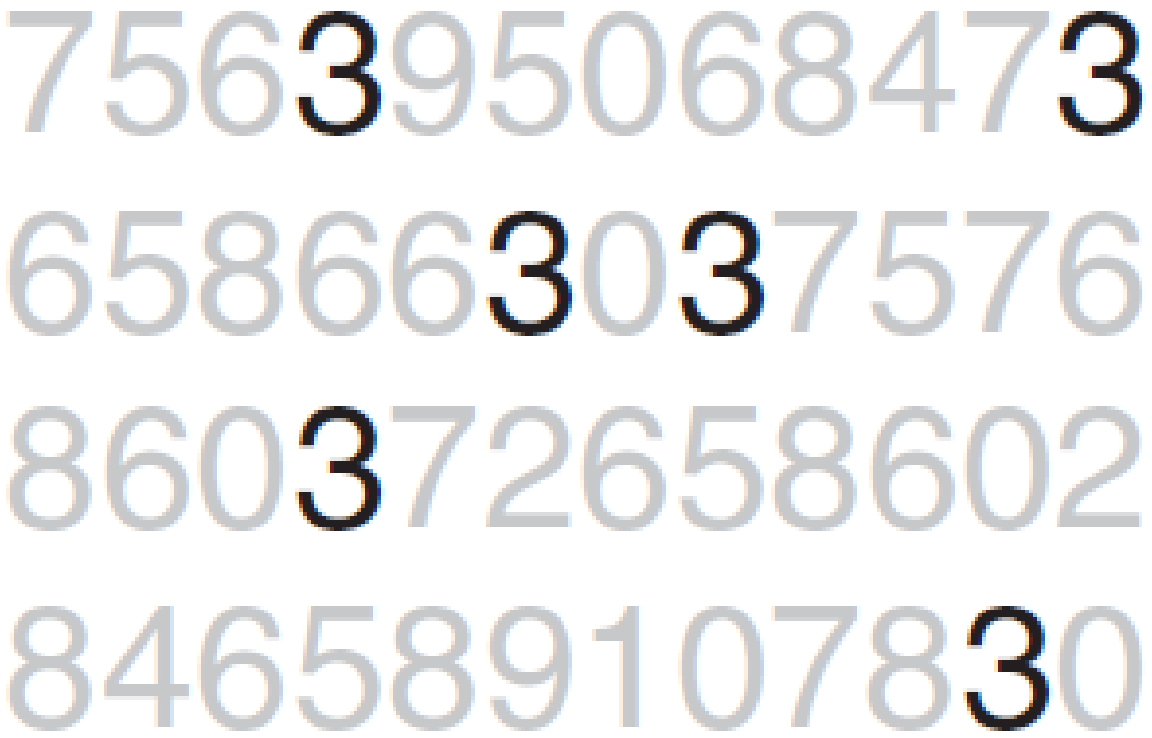

"Saya mengingat informasi ini."

Kaitan dengan *Storytelling Data*

Tahap	Dalam presentasi data	Yang perlu dilakukan
Iconic	Audiens pertama kali melihat grafik	Gunakan visual yang jelas dan menonjol
Short-term	Audiens mencoba memahami grafik	Kurangi informasi yang tidak perlu
Long-term	Audiens mengingat pesan utama	Gunakan cerita, konteks, dan pesan yang bermakna

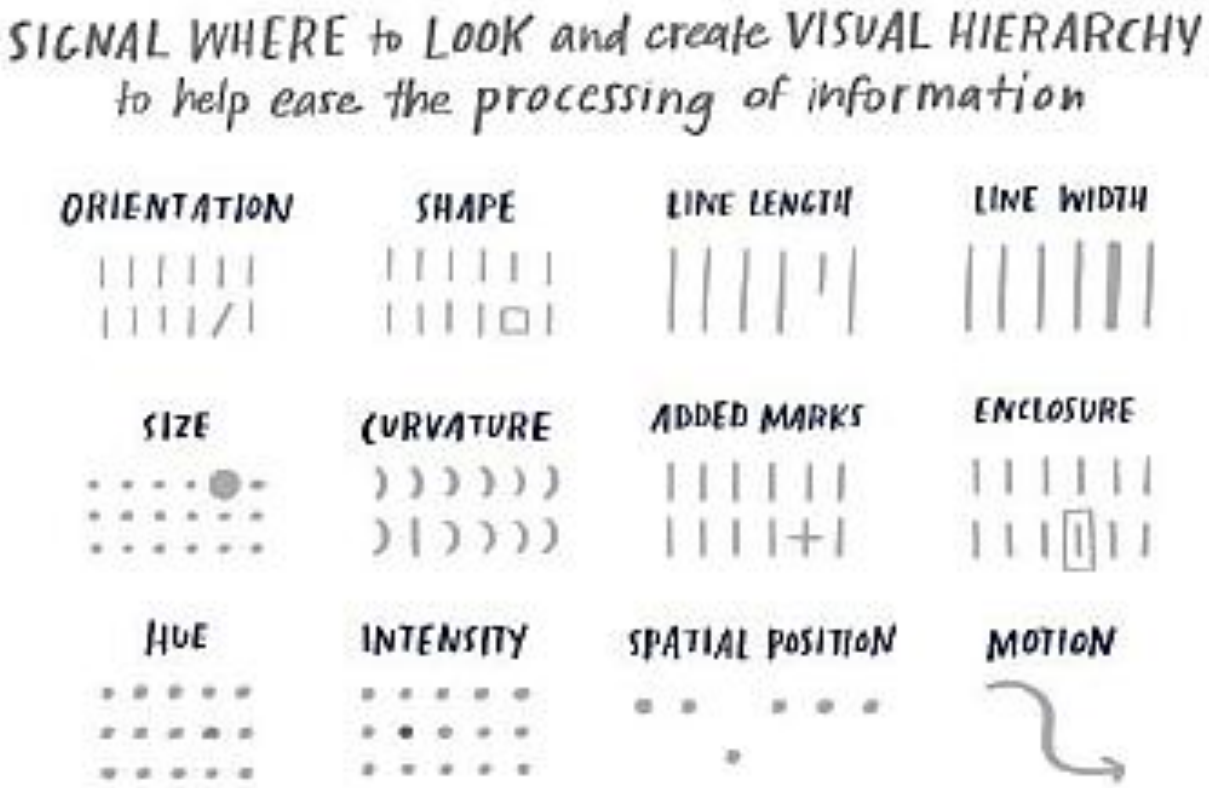

Hitung dengan cepat, berapa banyak angka 3!

Hitung dengan cepat, berapa banyak angka 3!

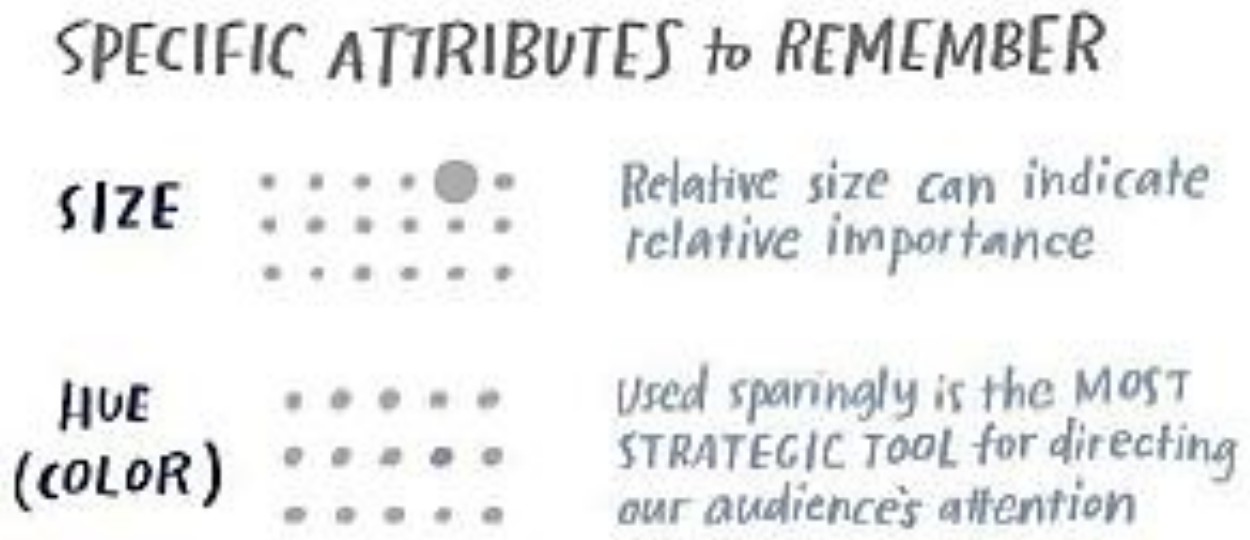

Preattentive Attibutes

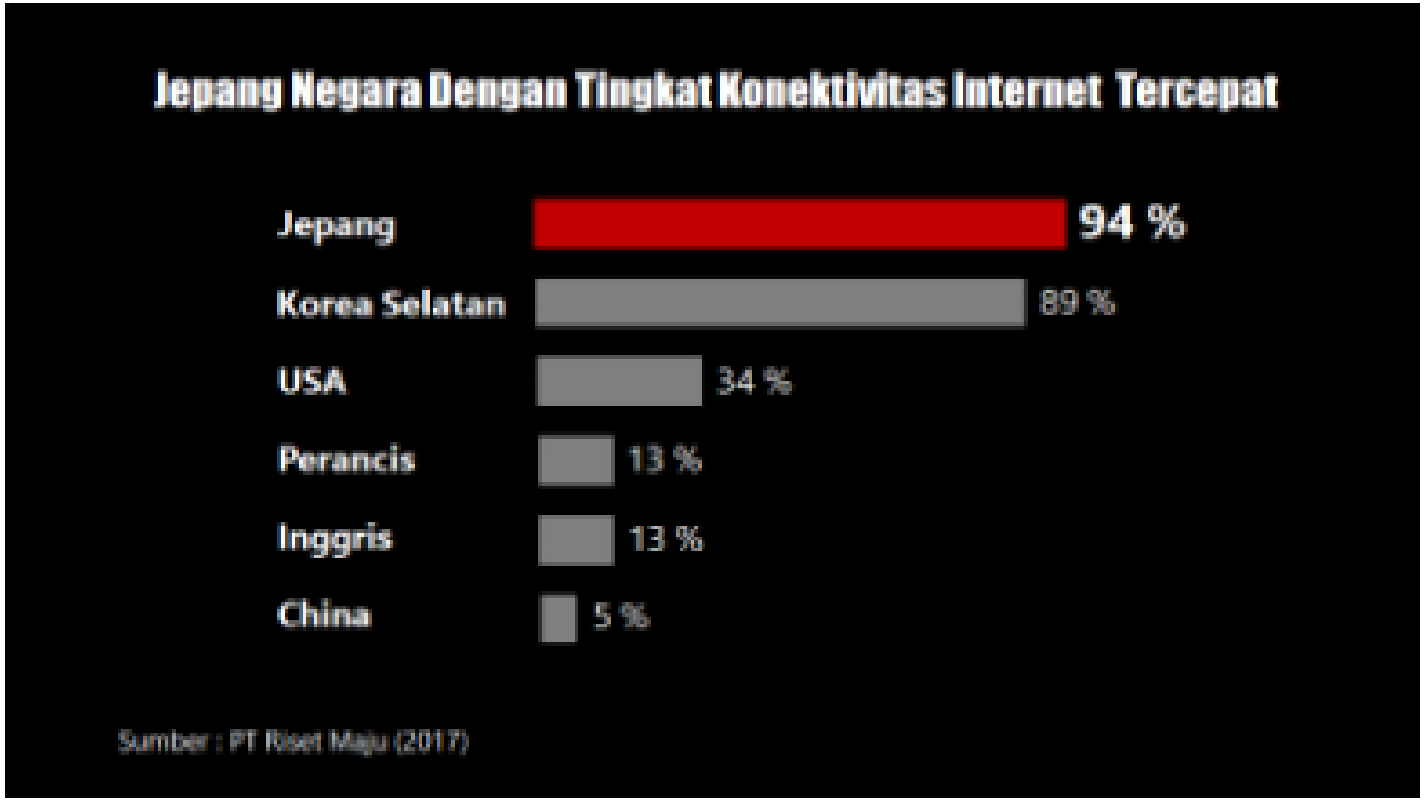

Preattentive Attributes

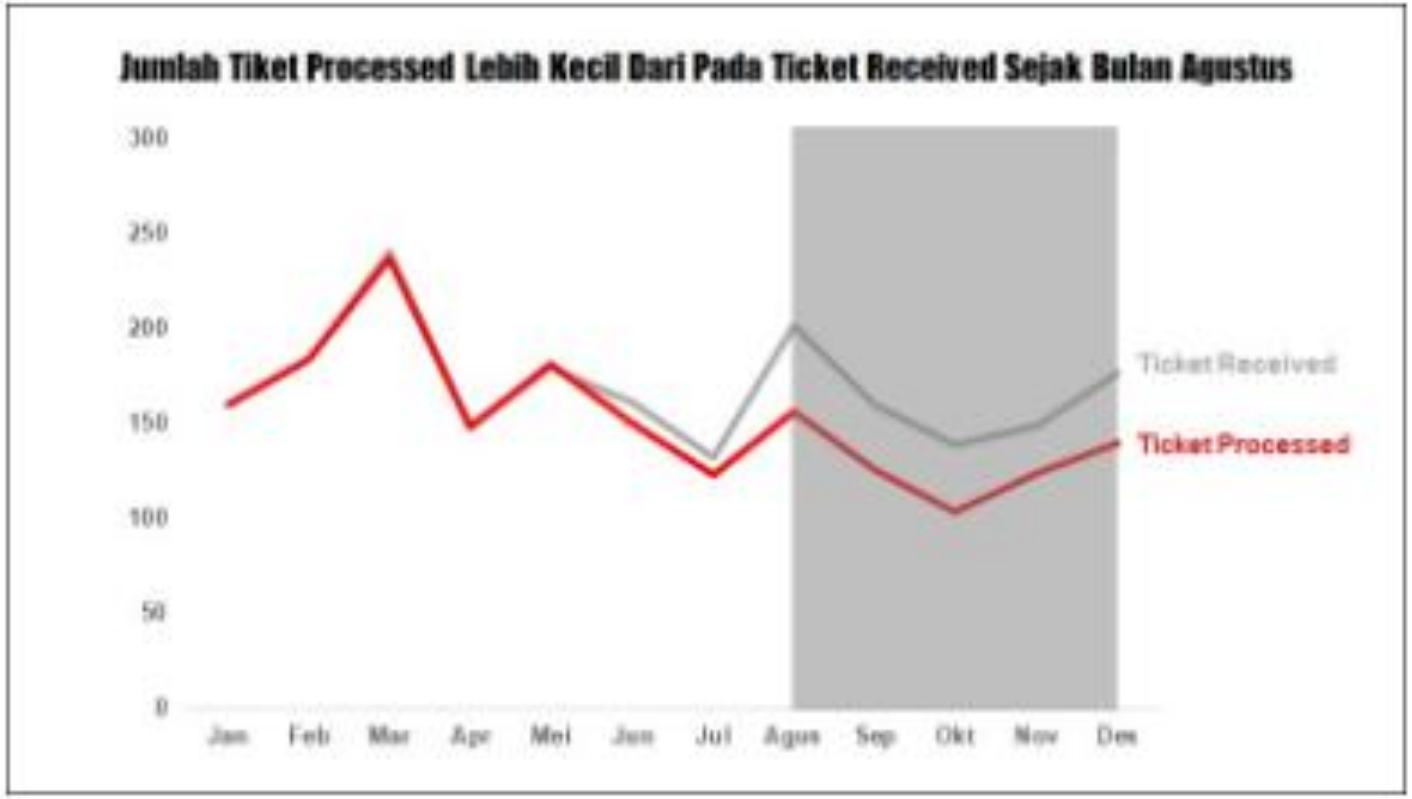

Specific Attributes to Remember

Contoh penggunaan preattentive attributes

Contoh penggunaan preattentive attributes

Contoh penggunaan preattentive attributes pada text

No preattentive attributes

What are we doing well? Great Products. These products are clearly the best in their class. Replacement parts are shipped when needed. You sent me gaskets without me having to ask. Problems are resolved promptly. Bev in the billing office was quick to resolve a billing issue I had. General customer service exceeds expectations. The account manager even called to check in after normal business hours.
You have a great company – keep up the good work!

Design with colorblind in mind

- 8% laki-laki mengalami *colorblind*
- Hindari penggunaan warna hijau dan merah secara bersamaan
- When I’m designing a visual and selecting colors to highlight both positive and negative aspects, I frequently use blue to signal positive and orange for negative **(Cole, 2015)**

Spatial Position

SPATIAL POSITION

Without other visual cues, we take in information starting at the top left and doing zig-zagging Z's across the page

Aim to work within this natural construct, placing important info at the top left – or making it clear what order to take it in otherwise

A TEST to ASSESS whether YOU are using PREATTENTIVE ATTRIBUTES STRATEGICALLY

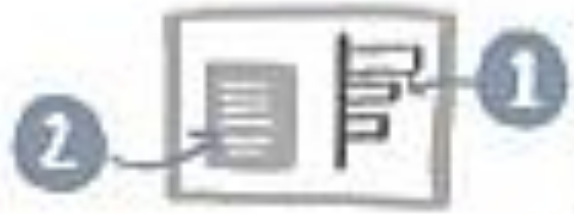

Close your eyes ...

... then look back at your slide / graph ...

take note of where your eyes go ...

this is where your audiences eyes will likely go

Evaluate & make changes as needed

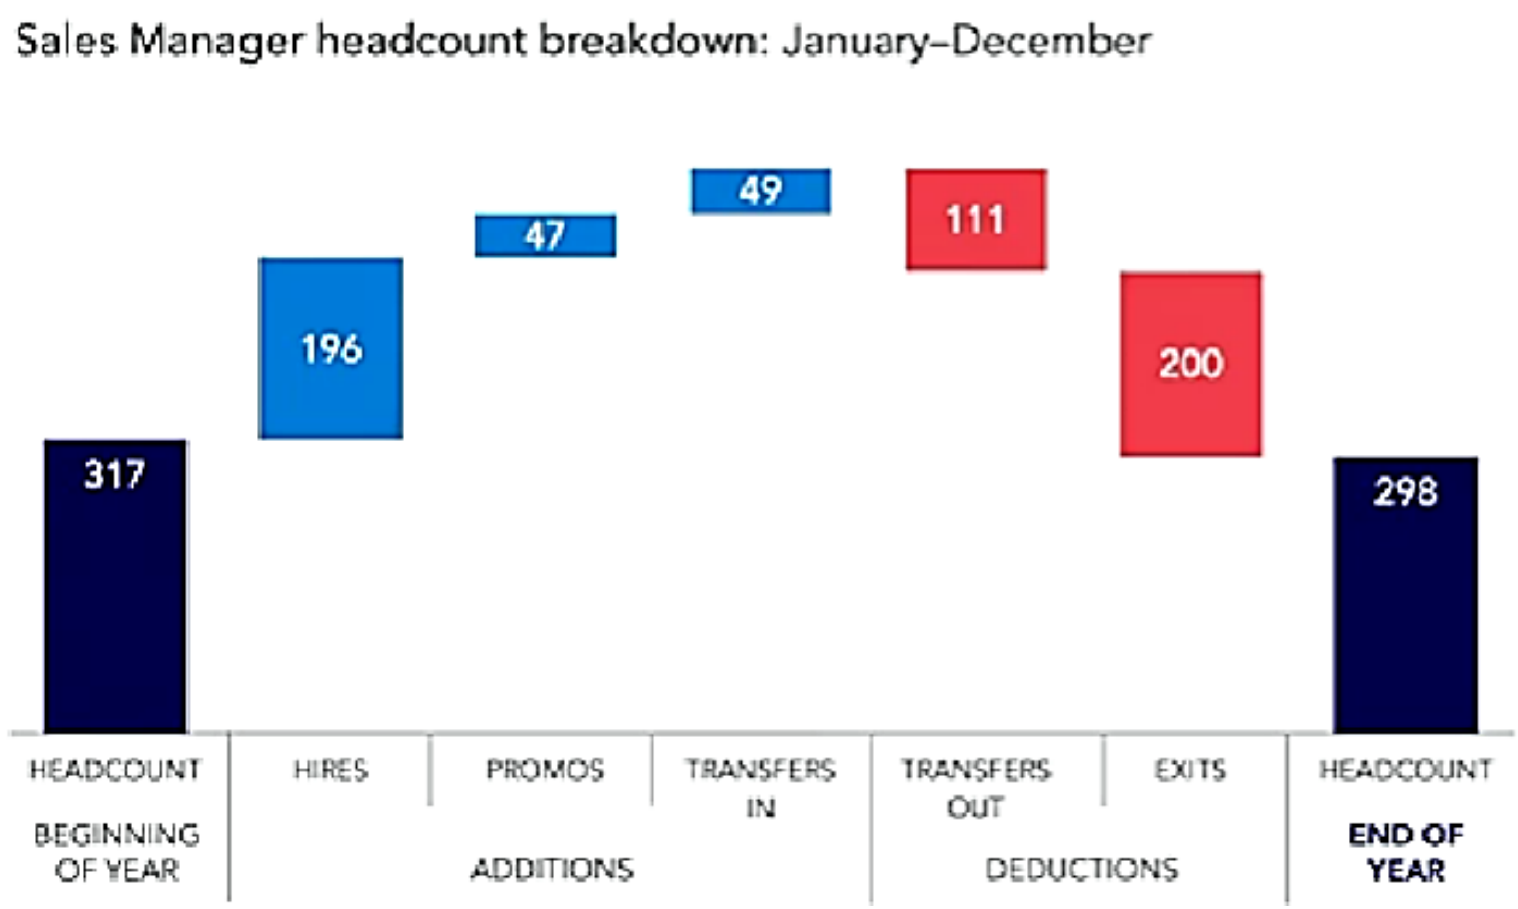

Tugas : perhatikan 2 slide terakhir dan berikan komentar dari keduanya
